

# Distinctive DDoors

## Elegant Entrance™ Threshold

**IMPORTANT:** Before proceeding with the installation, your door, frame, and panels need fully decorating.

Before decoration, your door set should be fully disassembled to allow for all cut-outs and untreated surfaces to be accessed. This includes removal of the MXS threshold which is fixed to the timber cill.

- 1: Remove threshold as well as other seals and fittings.
- 2: Decorate everything fully, treating all cut-outs, grooves and surfaces, as per our instructions at [https://www.distinctivedoors.co.uk/decorating\\_your\\_door](https://www.distinctivedoors.co.uk/decorating_your_door)
- 3: Re-fit the threshold, applying silicone sealant underneath to prevent water ingress. DO NOT block the drainage holes.
- 4: Apply silicone sealant between joint between frame and threshold.
